WIPRO ASSIGNMENT

CA - Network

Assignment - 2

Real-world Application of parallel computing

Application: - weather forecasting systems

Parallel computing use

- * Speed up image reconstruction and analysis by processing multiple image slices simultaneously
- * uses multiple processors/cores for faster diagnosis

Networks system use

Connects diagnostic machines with hospital server and doctor

Enables real-time sharing of reports, images and remote consultations

Importance

Ensures quick, accurate and life-saving diagnosis.

Provide faster access to patient data and AI-based analysis.
